

AIO IRON FILTER

Easy Installation / Programming Guide

Step 1

After installation, leave the valve in bypass mode and turn the water supply back on.

Next, put the valve in **Backwash**. To do this hold down the **REGEN** button for 5 seconds.

Continue to **Step 2**.

Step 2

Once the backwash countdown begins, slowly open the bypass inlet side. This will release the air from the tank while preventing the media from being lifted into the drain line.

Step 3

After all the air has been released, fully open the bypass on both the inlet and outlet sides.

Push **REGEN** to advanced through cycles until you are back to time of day.

Step 1

Press **NEXT** and **DOWN (▼)** together for 5 seconds, then release. If nothing happens, the valve is locked (see ** at bottom of step).

Use **UP (▲)** or **DOWN (▼)** to select **SOFTENING**, then press **NEXT** to continue to Step 2.

****If Valve is Locked:**
Press **DOWN (▼)** → **NEXT** → **UP (▲)** → **REGEN** then repeat **NEXT** and **DOWN (▼)** together for 5 seconds

Press **REGEN** to exit setup.

Step 2 - Set Regen

Use **UP (▲)** or **DOWN (▼)** to select Brining Direction

Set the screen to "Dn"

This screen will not appear if Step 1 was set to Filtering.

Press **NEXT** to go to **Step 3**.
Press **REGEN** to return to the previous step.

Step 3 - Set Regen

Use **UP (▲)** or **DOWN (▼)** to select Refill Location:

Set Regen to Post (PoSr)

PoSr - Refill brine after the final rinse

PrE - Refill brine four hours before the regeneration time

Press **NEXT** to go to **Step 4**.
Press **REGEN** to return to the previous step.

Step 4 - Backwash

Use **UP (▲)** or **DOWN (▼)** to set the time for the first cycle.

Set to 12 minutes

Press **NEXT** to go to **Step 5**.
Press **REGEN** to return to the previous step.

Step 5 - Brine

Use **UP (▲)** or **DOWN (▼)** to set the time for the second cycle. (Default=60 minutes)

Set to 40 minutes

The display will flash between cycle number, time, and brine direction (**UP** or **dn**)

Press **NEXT** to go to **Step 6**.
Press **REGEN** to return to the previous step.

Step 6 - Second Backwash

Use **UP (▲)** or **DOWN (▼)** to set the time for the third cycle.

Set to OFF

Press **NEXT** to go to **Step 7**.
Press **REGEN** to return to the previous step.

Step 7 - Rinse

Use **UP (▲)** or **DOWN (▼)** to set the time for the fourth cycle.

Set to OFF

Press **NEXT** to go to **Step 8**.
Press **REGEN** to return to the previous step.

AIO IRON FILTER

Easy Installation / Programming Guide

Step 8 - Fill

Use **UP** (▲) or **DOWN** (▼) to set the pounds for the fifth cycle.

Set to OFF

Press **NEXT** to go to **Step 9**.
Press **REGEN** to return to the previous step.

Step 9 - Capacity

Use **UP** (▲) or **DOWN** (▼) to set the System Capacity.

Set to 80.0 x 1000

Press **NEXT** to go to **Step 10**.
Press **REGEN** to return to the previous step.

This should be based on the volume of resin and the pounds of salt fill set in Step 8.

Step 10 - Set Regen

Use **UP** (▲) or **DOWN** (▼) to set the Volume Capacity.

Set to Off

Press **NEXT** to go to **Step 11**.
Press **REGEN** to return to the previous step.

Step 11 - Set Regen Interval

Use **UP** (▲) or **DOWN** (▼) to set the Regeneration Timer.

Press **NEXT** to go to **Step 12**.
Press **REGEN** to return to the previous step.

Set to 28 Day

Step 12 - Relay

Use **UP** (▲) or **DOWN** (▼) to set the Relay Operation.

Set to OFF

Press **NEXT** to go to **Normal Mode (Service)**.
Press **REGEN** to return to the previous step.

Step 15 - Day Override

Press and hold **NEXT** and **(UP)** ▲ simultaneously for about 5 seconds, then release. This enters the Installer Display.

Use **(UP)** ▲ or **(DOWN)** ▼ to select the number of days that regeneration will occur after.

Set to Day 3

Press **NEXT** to go to **Step 16(a)**.
Press **REGEN** to return to the previous step.

Step 16 - Regen Time

Use **(UP)** ▲ or **(DOWN)** ▼ to set the hour you want the regeneration to begin.

Set Hour to: 12 AM

Press **NEXT**, now the minutes will flash.
Use **(UP)** ▲ or **(DOWN)** ▼ to set the minutes you want the regeneration to begin.

Set Minutes to: 00

Press **NEXT** to finish installer settings.

Step 17 - Setting Clock

From normal mode (service), press and hold **(DOWN)** ▼ until **SET TIME** shows and the hour flashes.

Use **(UP)** ▲ or **(DOWN)** ▼ to adjust the hour.

Press **NEXT** — now the minutes will flash.

Use **(UP)** ▲ or **(DOWN)** ▼ to adjust minutes.

Press **NEXT** again to save and return to the main screen.

IMPORTANT INSTRUCTION PLEASE READ:

After all air has been released from the tank and you've confirmed or adjusted the settings, press and hold the **REGEN** button for **5 seconds**. This starts an immediate regeneration cycle and draws the air pocket into the tank. The system will automatically run through a full regeneration and finish on its own—no further action required. When the cycle completes, your system is ready for use and the installation is complete.
